

**The Children First Learning Partnership
Alcohol and Substance Misuse Policy
2023-2025
(Version 2)**

The Alcohol and Substance Misuse Policy in respect of the Children First Learning Partnership has been discussed and adopted by the Directors Board after consultation with Unions

Chair of Board:

Mrs N. Chell

Responsible Officer:

CEO – Mrs A Rourke

Agreed and ratified by the Directors

23rd October 2023

To be reviewed:

October 2024

Success Indicators

The following indicators will demonstrate the level of compliance with this policy and its procedures; -

- a) Each manager/headteacher is aware of the policy.
- b) Employees are aware of the Standards of Behaviour expected by the Children First Learning Partnership.
- c) Employees with an alcohol or a substance misuse problem are encouraged to seek early help.
- d) Managers identify and challenge inappropriate standards of behaviour therefore preventing unacceptable risks and situations.
- e) Children First Learning Partnership is in a position to support employees in return to work.

1. Application

This policy covers all employees of the Children First Learning Partnership. Agency staff will also be advised of this policy and that impairment resulting from the misuse of alcohol or substances will not be tolerated. The use, possession, production or supply of illegal drugs on site is never tolerated and will be reported to the police.

2. Introduction

The welfare of its employees is important to the Children First Learning Partnership. In the first instance, and for as long as this continues to be productive, the Children First Learning Partnership will respond to alcohol or substance misuse problems as a health issue. Someone who misuses alcohol or substances can put themselves, their colleagues and other stakeholders at risk of harm and it is with these matters that we, as an employer, are concerned.

The purpose of this policy is to reduce the detrimental effects that can be caused by alcohol or substance misuse such as accidents, incidents, absenteeism, reduced productivity, legal costs, public and client alienation and business reputation.

3. Aims and Objectives

- To promote an understanding of the effects and risks associated with misuse of alcohol and drugs, including prescribed medication, by providing employees with information.
- To encourage employees with an alcohol or a substance misuse problem to seek early help.
- To enable managers and headteachers to identify job performance problems that may be attributable to the effects of alcohol or substances and take the appropriate action through the provision of training in attendance management (see Appendix 2).
- To ensure that stakeholders and colleagues are not put at risk as a result of an alcohol or substance misuse by employees.
- To communicate to employees that concealing, condoning or colluding with colleagues having problems related to alcohol or substance misuse is counterproductive, does not help the individual and is incompatible with this policy.
- To make available appropriate assistance – in the form of confidential support, advice and counselling to employees who suspect or know that they, or colleagues, have or may be developing a dependency problem.

4. Definitions

Substance – covers legal substances such as alcohol, over the counter medication, prescription drugs such as codeine, and workplace chemicals such as solvents, as well as illegal drugs such as cannabis, cocaine and heroin.

5. The Arrangements for Applying the Policy

5.1 Standards of Behaviour

The following statements express how the Children First Learning Partnership expects employees to conduct themselves in order to ensure that alcohol or substance misuse does not have a detrimental effect on their work, irrespective of the nature of that work.

- a) The Children First Learning Partnership acknowledges that the use of alcohol outside of working hours remains the choice of the individual, although employees are urged to follow health guidelines relating to its use. However, either before or during periods of duty employees should not consume alcohol or substances that will cause impairment or impact upon their ability to work safely and/or to required standards.

- b) Just as staff should ensure that their conduct and performance in the workplace is not impaired, staff on the Children First Learning Partnership business away from the Children First Learning Partnership premises must ensure that the use of alcohol does not result in professional misconduct or impairment, and does not compromise either their own safety or the safety of others.
- c) It is not acceptable that staff will use be under the influence of alcohol or consume alcohol during working hours or on business premises.
- d) The possession, use, production or supply (selling or giving) of illegal drugs on site will not be tolerated. Aside from being a serious breach of this policy, justifying disciplinary action, such conduct is also a criminal offence and any instances will be reported to the police in line with our statutory responsibility under the Misuse of Drugs Act 1971.
- e) It is the responsibility of employees in consultation with their GP or Pharmacist to ensure that prescribed or over the counter medication does not impact upon their conduct or ability to work safely or to required standard during periods of duty. Any employee with concerns in this regard should confer with their manager/headteacher; the manager/headteacher will determine whether any further action would be appropriate, such as an adjustment to duties and/or referral to Occupational Health.
- f) Vehicle drivers have responsibilities under the Road Traffic Act 1991 which sets the legal limit for driving at 35 micrograms of alcohol in 100 millilitres of breath (or 80 milligrams of alcohol in 100 millilitres of blood) and the Road Traffic Act 1988 where a person must not drive, attempt to drive or be in charge of a motor vehicle under the influence of a substance (drugs or alcohol). The Occupational Road Risk and Driving for Work requires that drivers do not consume any alcohol during the working day and drivers should be aware that alcohol from drinking the day before can still be in the blood for an indeterminable time. Managers/headteachers who suspect that an employee is in breach of this legislation must take suitable action and where necessary report this to the police for investigation.

5.2 Support

The Children First Learning Partnership, as a responsible employer, will facilitate help and advice with rehabilitation for those seeking it, and will encourage employees who suspect or know they have an alcohol or substance misuse problem to take advantage of the support offered.

Managers/headteachers who identify instances of apparent misuse must ensure that their response is open-minded, confidential and sympathetic. They are responsible for ensuring that the employee is aware of the sources of support available and how to access them, which in most instances will be via the Occupational Health Unit. Managers/headteachers must balance

this with their responsibility to ensure health and safety management in the workplace. If the individual is in a safety critical role they must also implement Section 5.8 and challenge the misuse of alcohol/substances.

Absences for assessment or treatment will be recorded as 'a medical appointment' in accordance with the Children First Learning Partnership's Managing Attendance at Work Policy.

Where an individual employee is referred to Occupational Health by their manager/headteacher or is interviewed as a result of disciplinary action they have the right to be accompanied by their Trade Union representative, work colleague, or professional advocate. In relation to Occupational Health appointments, employees will have an initial discussion with the occupational professional privately and then trade union/other individuals can join the appointment.

Employees seeking support with alcohol/substance misuse will be requested to enter into a behavioural agreement. (See Appendix 7). This is to ensure that all parties are clear on the terms upon which support is offered and the potential consequences of failure to adhere to the agreement.

5.3 Confidentiality

Any employee with an alcohol or substance misuse problem will be treated in confidence subject to the provision of the law.

Information will only be shared amongst services involved in treatment and support if a consent form to that effect has been signed by the employee. The purpose of reports from Occupational Health will be to provide managers/headteachers with a medical opinion of the employee's capability to undertake their job. Information will only be provided to a Manager/Headteacher by Occupational Health following discussion with the employee.

5.4 Sickness

Absence for alcohol or substance misuse treatment and rehabilitation will be regarded as normal sickness. It is expected, if an employee is signed off as sick due to alcohol or substance misuse problems, that treatment is received during that period and that management are kept fully informed of treatment processes and outcomes.

5.5 Treatment

If an employee requests or is offered help and support having identified an alcohol or substance misuse problem, support and advice on treatment services will be offered without undue delay. Employees are encouraged to enlist confidential help by referral through Human Resources and Occupational Health who will approve the use of external specialist

treatment and monitor the progress of the employee in conjunction with their manager/headteacher.

Employees attending appointments for treatment should give reasonable notice to their manager/headteacher. The absences for treatment will be recorded as 'a medical appointment' in accordance with the Children First Learning Partnership's Managing Attendance at Work Policy.

5.6 Returning to Work

When an employee returns to work they will be offered support in reintegrating back into the workplace, safely. During this period of assistance, and where this would assist rehabilitation, the employee will be considered for redeployment to other duties. Alternatively, adjustments to current duties may be considered, especially where it is felt that there are safety issues related to their re-integration. In certain instances, recertification of license to drive may be required before the employee can return to their contractual duties. This will be in accordance with the County Council's Occupational Road Risk Policy and Driving for Work Guidance as well as DVLA standards regarding fitness to drive.

5.7 Relapse

The Children First Learning Partnership recognises that relapses may recur during the period of recovery, which may lead to a person returning to misusing alcohol or the substance they had previously stopped using. Should this occur, the Children First Learning Partnership will continue to offer support towards full recovery as in the first instance. If the offer of support and treatment is not taken up, or where there is little or no evidence of change and improvement, then recourse may be made to the disciplinary procedure.

Employees who refuse or discontinue with treatment/professional help, despite their attendance/performance continuing to be affected, must understand this will be addressed in accordance with the Managing Attendance at Work Policy/Disciplinary Policy.

5.8 Challenging Misuse of Alcohol, Drugs and Substances

Where there are concerns regarding the misuse of alcohol or substances the manager/headteacher will speak to the employee privately. The manager/headteacher should inform him/her of the suspicion that he/she may be unfit to work through the effects of alcohol, drugs or other substance and arrange for him/her to be relieved of duty immediately. An interview will then be held between Manager/Headteacher and employee. The manager/headteacher should note the employee's response and where appropriate should contact the testing service (and inform CEO/COO). If the manager/headteacher is satisfied those alcohol/substances is not the cause for the behaviour and there are other reasons then testing may not be appropriate. Managers/headteachers must make this decision on an

individual basis and should make a record of the discussion on the Record of initial Interview regarding “for cause” testing (Appendix 6).

Managers/headteachers must then seek advice from HR Advisors regarding the longer-term management of the situation. HR Advisors will be able to advise whether the individuals should be suspended from duty as a neutral act pending formal investigation in line with the Disciplinary Policy.

In conjunction with HR/CFLP the manager/headteacher will decide if police involvement is required as detailed in 5.1 of this policy.

5.9 Testing

This section only applies to staff in safety critical roles as defined in section 5.9.1 of this document.

The Children First Learning Partnership has established testing procedures to support managers/headteachers in having an additional option to confirm an individual is under the influence of alcohol or substances.

It is not always practicable to undertake testing. Not having undertaken testing does not preclude management action and managers/headteachers are expected to follow the procedure detailed in Section 5.8.

The Children First Learning Partnership will take action, in the form of seeking consent for testing for the presence of alcohol or other substances, if they have cause to believe that an employee, in a safety critical role, is under the influence of alcohol/substances, breaking the law, or whose standards of behaviour are increasing the risk of harm to themselves or their colleagues. The testing of an employee will take place if both criteria for the test are met which are

- a) that the employee works in a role defined as safety critical and
- b) there is cause.

The position with regard to testing is: - **With cause for staff working in safety critical occupations.**

Where testing takes place, the individual will be invited to give written consent. Failure to give consent or refusal to provide a sample without good cause will be considered to be a breach of procedure and will lead to disciplinary action being taken, up to and including dismissal.

If employees refuse consent to be tested then managers/headteachers must record this and must contact HR for advice and support and arrange an interview with the employee as detailed in Section 5.8 of this document.

Testing will be carried out by a competent independent contracted organisation who will send a Testing Officer to site following a request by the manager/headteacher.

The Testing Officer will, upon consent, take a breath test from the employee and record the results on Appendix 6.

Where an individual is found to be over the drink driving limit (35 micrograms of alcohol in 100 millilitres of breath) the employee will be informed. The testing officer will inform the headteacher who will suspend the employee on full pay, pending further disciplinary investigations.

Managers/headteachers should not try and stop the employee from leaving the workplace, but should advise them not to drive. It is **not** the manager/headteacher's responsibility to remove the employee's car keys. However, if it is a Children First Learning Partnership owned vehicle, it is appropriate to remove their authorisation to drive the vehicle and request return of the keys. A manager/headteacher may try and help the individual to arrange transport by allowing access to the telephone. If the manager/headteacher believes that an employee is driving under the influence of alcohol they should contact HR regarding informing the police that an employee has potentially committed a criminal offence which may require the police to investigate.

Taking no action places the manager/headteacher in the position of having committed an offence by failing in their statutory duties under health and safety legislation

Where an individual is found to be under the drink driving limit (35 micrograms of alcohol in 100 millilitres of breath), but some level of alcohol is detected, the employee will be informed, and the level recorded. The manager/headteacher will determine if it is acceptable for the employee to continue their duties, and then arrange a meeting to discuss any support the employee may need. If the cause for testing was serious misconduct, a return to work may not be appropriate.

If the result of the test detects no alcohol then the employee will be informed, and the manager/headteacher will discuss any outstanding concerns regarding behaviour that led to them arranging testing. The employee is then able to return to work, unless serious misconduct was the original reason for testing. If serious misconduct was identified managers/headteachers need to seek advice and guidance from HR as in these circumstances disciplinary procedures may need to be initiated.

Testing Service - Contact Details

SynLab Services are the organisation appointed to undertake testing where the criteria **"With cause, for staff working in safety critical occupations"** is met.

To arrange for testing the manager/headteacher should inform COO for account information and telephone the SynLab Services coordinator on 01873 856688. See Appendix 4 for more detail on the alcohol testing procedures.

Costs of Testing

The cost of testing will be met from school budget. See Appendix 8 for details of the costs of testing.

5.9.1 Safety Critical

Safety critical refers to a position which requires the post holder to perform duties which are directly related to the safe operation or security of a facility, piece of equipment or vehicle, handling of chemicals, working with or supervising children/young people or vulnerable adults, or working at height or in confined spaces and which, if not performed properly, could result in a serious safety risk or environmental hazard to employees, stakeholders, young people, a facility or the general public.

An employee who has the responsibility of supervising employees who perform such duties or work with children/young people shall also be considered as occupying a safety critical position.

All customer-facing posts will be deemed to be safety critical due to the responsibility an employee has for a customer on council premises.

In addition to the above any employee who drives or may be expected to drive whilst undertaking their council duties will also be deemed to be safety critical.

5.9.2 With Cause

'With cause' means if an employee's conduct, behaviour, appearance etc give management due cause to believe that the employee is unable or unsafe to undertake their duties to required standards. (See Appendix 2)

5.10 Disciplinary Process

The aim of this policy is to encourage people with problems to acknowledge the need for help and seek support and treatment in order that they can continue in work or return safely to work. Managers/headteachers will be responsible for taking decisions about disciplinary action if:

- Help and support are refused and performance continues to be impaired
- Testing is refused without good cause
- If a positive test result is received

Any employee whose performance is impaired through drug or alcohol misuse could be subject to disciplinary action in accordance with the Children First Learning Partnership disciplinary procedure.

Action will be taken by the Children First Learning Partnership in the case of the illegal possession, production or supply of drugs on any site and will be reported to the police.

5.11 Information and Training

All managers/headteachers and staff will have access to the policy and in order to promote awareness and greater understanding materials will be provided along with appropriate guidance and training.

5.12 Contractors

Managers/headteachers are expected to request that any contractor who appears to be affected by alcohol or substance misuse stop their activities. The contractor's employer should be contacted immediately and informed so that they can take suitable action regarding their employee. The person who arranged for the contractor to complete the work must also be informed, so that they can discuss any actions required with the organisation.

6. Monitoring and Review

This policy will be monitored and reviewed every 2 years by the Children First Learning Partnership.

7. Legislative Framework

1. The Health and Safety at Work etc Act 1974.
2. The Management of Health and Safety at Work Regulations.
3. Misuse of Drugs Act 1971 - The possession, supply (dealing whether selling or giving) or production of drugs on any site will be immediately reported to the police and action will be taken within the disciplinary procedures of the company. This law describes the most commonly misused substances in the UK (see Appendix 1). This Act also outlines that it is an offence for companies to allow their premises to be used for supplying or producing drugs and contravention carries severe penalties.
4. Road Traffic Acts 1991 and 1988 - The Road Traffic Act 1991 sets the legal limit for driving at 35 micrograms of alcohol in 100 millilitres of breath or 80 milligrams of alcohol in 100 millilitres of blood.

5. The Road Traffic Act 1988 states that a person must not drive, attempt to drive or be in charge of a motor vehicle whilst unfit through a substance (drink or drugs).

8. Further Advice and Information

This policy document is for general guidance only. If you need any further advice on how to apply this policy, please contact your HR Team.

Further information and national helpline numbers are given in Appendix 3.

Appendix 1

The Misuse of Drugs Act 1971

The most commonly misused substances in the UK have been classified under this Act.

The classifications identify the substances considered to be the most harmful to an individual and society.

Class A	Heroin
	Cocaine
	Crack Cocaine
	Amphetamine if prepared for injection
	LSD
	Magic Mushrooms*
	Morphine
Class B	Amphetamines
	Barbiturates
	Cannabis
	Ketamine
Class C	Anabolic Steroids
	Tranquillisers
	Poppers
	Rohypnol GHB

Appendix 2

Guidelines for Identifying Alcohol and Substance Misuse

Alcohol and substance misuse is not restricted to any particular section of the community. Remember that those who misuse alcohol and substances may be difficult to identify. Remember those who misuse alcohol and substances don't all fit the stereotypical view.

The earlier an individual's problem can be identified the more likely it is that he or she can be successfully helped to overcome it.

Work related problems often caused by alcohol or drugs may include the following, but other factors could also cause similar behaviour.

This is not an exhaustive list and it should be used sensitively by managers/headteachers, as these can also be indicators of other health/personal problems.

Absenteeism

- Multiple instances of unauthorised absence.
- Excessive sick leave.
- Frequent and/or unexplained absences
- Poor timekeeping
- Regularly leaving work early.
- Peculiar and increasingly improbable excuses for absence.
- Repeated absences from the post, more than the job requires, including frequent trips to the cloakroom etc. and overlong coffee breaks.

High Accident Rate

- Accidents at work.
- Accidents off the job e.g. at home or travelling to work.

Appearance/Mental State

- Pallor or flushed face and bleary eyes.
- Pinpoint or dilated pupils.
- Smell of alcohol.
- Excitability/depression.
- Hand tremors.
- Inappropriate behaviour, swearing, mood swings (which appear out of character).
- Increasingly unkempt appearance, lack of hygiene.
- Aggression/fear/guilt.

Deteriorating Efficiency

- Missed deadlines.
- Mistakes due to inattention or poor judgement.
- Making bad or incorrect decisions.
- Complaints from colleagues or members of the public.
- Unlikely excuses for poor job performance.
- Increasing unreliability and unpredictability and difficulty in recalling instructions.

Appendix 2

Poor Employee Relations

- Over reaction to real or imagined criticism.
- Irritability.
- Complaints from colleagues and co-workers.
- Borrowing money from co-workers.
- Dishonesty/over-justification.

In some cases, an employee with a drink or drug problem may come to your attention through an incident of poor behaviour at work with varying degrees of associated misconduct. Obviously, each case must be considered individually depending on the person's job, their previous pattern of behaviour and the nature of the incident involved.

Alcohol Testing Procedures

Where a manager/headteacher has just cause to suspect an employee, in a safety critical role, is unable or unsafe to undertake their duties to required standards as a result of alcohol they can request an alcohol test to be administered. Testing will be carried out by a competent independent contracted organisation who will send a Testing Officer to site following a request by the manager/headteacher.

The Testing Officer will be expected to question the manager/headteacher's grounds for the request in order to establish the degree of reasonableness.

Some examples of circumstances where this may be appropriate are:

- Obvious signs of mental and/or physical impairment;
- Recognition by managers/headteachers, supervisors or colleagues of symptoms affecting work performance;
- Complaints from the public or stakeholders indicating that alcohol may be a factor;
- The discovery of items in possession by an individual that could indicate involvement with alcohol;
- Smelling of alcohol;
- After an accident or incident.

Refer to appendix 2 for further information on identifying alcohol and substance misuse.

Steps to be taken

1. The manager/headteacher will speak to the employee privately. Inform him/her of the suspicion that he/she may be unfit to work through the effects of alcohol and arrange for him/her to be relieved of duty immediately. A discussion will then be held. If after this discussion the manager/headteacher still has cause for concern the individual will be requested to undertake an alcohol breath test.
2. The manager/headteacher should contact the SynLab Services (the testing organisation) by calling **01873 856688** who will arrange the testing (informing the CEO/COO of the Children First Learning Partnership and HR)
3. The employee will be asked to remain on site in order to make themselves available for the testing. The manager/headteacher will also be required to remain on site.
4. Prior to testing the donor will be required to show photo id. If this is not possible managers/headteachers will be asked to confirm the identity of the donor.
5. With cause tests for those in safety critical roles will be subject to on-site breath test which allows all individuals who test negative to be informed accordingly and allowed to resume work immediately.
6. If the on-site test is positive for alcohol, the individual will be told of the results.
7. Where an individual is found to be over the drink driving limit (35 micrograms of alcohol in 100 millilitres of breath) the employee will be offered a short intervention in terms of advice about the local support available to them and their family. The testing officer will inform the

manager/headteacher of the results. The manager/headteacher will contact directorate HR who will discuss the appropriate action to take, pending further disciplinary investigations.

8. Where an individual is found to be under the drink driving limit (35 micrograms of alcohol in 100 millilitres of breath, but some level of alcohol is detected, the employee will be informed, the level recorded and advice provided. The manager/headteacher will determine if it is acceptable for the employee to continue their duties, and then arrange a meeting to discuss any support the employee may need. If the cause for testing was serious misconduct, a return to work may not be appropriate.
9. If the result of the test detects no alcohol, then the employee will be informed, and the manager/headteacher will discuss any outstanding concerns regarding behaviour that led to them arranging testing. The employee is then able to return to work, unless serious misconduct was the original reason for testing.

Arrangements required for testing

Managers/headteachers should ensure that a room is made available for the testing process which has two chairs, a desk and will remain private once the testing procedure has begun.

Challenging Test Results

If an employee wishes to undertake a formal challenge to an alcohol test they must put their request in writing to the Board of Directors within 10 working days of receipt of notification of the confirmed positive result, who will review the procedure followed.

Alcohol Testing

It is important that you fully understand the process of alcohol testing using breath. You should therefore take a moment to read this sheet. If you have any questions regarding this procedure, or you do not understand a particular part of the process, please ask the testing officer.

Background

Drugs and alcohol now play a part in many people's lives. Your employer has a responsibility to ensure that drugs or alcohol do not affect performance at work and thereby put you and your colleagues at risk of harm. As part of the Children First Learning Partnership's drug and alcohol policy you have been requested to provide a sample of breath for alcohol analysis.

How will samples be collected?

All alcohol screening must follow strict chain of custody procedures which are legally defensible. Proper chain of custody means that the sample is collected in the right way and that sample is not compromised in any way from collection all the way through to the result being issued. If you are being screened for alcohol, this will be carried out using a sample of breath. The results of the alcohol test will be available within minutes of the test being carried out.

Will I have to provide any information to the collection officer?

Your identity will be confirmed by a management representative, alternatively you will be asked to show photographic proof of identity which may include company ID, passport, security photocard or driving licence. If employee does not have photo id with them, a witness e.g. manager/headteacher may be asked to confirm identity.

What is the process for alcohol screening?

You will be asked to give your consent to a sample of breath being taken. You will be informed of any presence of alcohol detected. If the test result is above 0.00mg\L you will be required to provide a second sample.

Failure to give consent or refusal to provide a sample of breath, without good cause will be considered to be a breach of procedure and will lead to disciplinary action being taken up to and including dismissal.

Frequently Asked Questions

Employee FAQ's

Q 1. If I consider another employee smells of alcohol what should I do?

It is important to raise concerns with the employee's manager/headteacher. The manager/headteacher can then, in a sensitive manner, discuss this matter with the employee directly and identify if any action or support is required. Your report will be dealt with in a confidential manner.

Q.2. Can I have a drink at lunch time and return to work?

All drivers must be aware of the low levels of alcohol permitted before they are in breach of the Road Traffic Act 1991. If you are in a safety critical job or drive in the course of work, you are reminded that any alcohol has a detrimental effect on judgement and reactions and you therefore must not consume any alcohol prior to undertaking safety critical work or driving. If you are not in a safety critical role or driving you must still consider how the detrimental effect that alcohol has on judgement and reactions and how this will affect your work and behaviour.

Manager/Headteacher FAQ's

Q 1. An employee refuses to provide consent to alcohol testing?

It is important that if manager/headteacher's wish to initiate testing for alcohol that they have established both that the employee is in a safety critical role and there is cause (see section 5.9.1 & 5.9.2 of this document.)

Consent is required to take a sample of breath. If consent is not provided this must be recorded and the employee suspended pending investigation.

Inappropriate behaviours from employees in both critical and non critical roles should be challenged and discussed by managers/headteachers. Human Resources can support Managers/Headteachers during this process.

Q 2. The employee leaves the premises before the testing officer arrives?

Managers/headteachers can only request that employees remain on site to await the testing officer. This should be managed sensitively to prevent embarrassment and anger. Managers/headteachers should not try and stop the employee from leaving the workplace, but should advise them not to drive. It is not the manager/headteacher's responsibility to remove the employee's car keys. However, if it is a Children First Learning Partnership's owned vehicle it is appropriate to remove their authorisation to drive the vehicle and request return of the keys. If a manager/headteacher strongly believes that an employee is under the influence of alcohol and they drive when they leave the site, managers/headteachers are advised to inform the police. Taking no action in these circumstances places a manager/headteacher in the position of having committed an offence by failing in their statutory duties under health and safety legislation.

Leaving the site before testing will be treated as refusal of consent to testing - see answer to question 2.

Q 3. The alcohol testing service is not available when required/ I suspect substance misuse what action should I take?

Managers/headteachers do not have to undertake testing to take action. It is important to challenge the behaviour with the employee and seek support and advice from Human Resources.

Not having undertaken testing does not preclude management action and managers/headteachers are expected to follow the procedure detailed in Section 5.8. Managers/headteachers do not need a positive test result to stop the employee they have concerns about undertaking duties that could affect the health or safety of another person. If the individual admits to alcohol consumption and agrees it has affected their attendance/behaviours/performance testing serves no purpose.

Q 4. I believe that an employee has driven for work purposes and I now suspect they are under the influence?

If you become aware that an employee is driving and you suspect they are under the influence of alcohol or substances, advise the employee not to drive. Remove authorisation to drive the Children First Learning Partnership owned vehicles and contact Human Resources regarding informing the police that an employee has potentially committed a criminal offence which may require the Police to investigate.

Taking no action places you in the position of having committed an offence by failing in your statutory duties under health and safety legislation.

Q 5. Other employees are asking questions regarding what is happening to the employee being tested. What do I tell them?

The details of your investigation, testing and support arrangements are confidential and must not be disclosed. It is recommended that you discuss with the employee what information they wish their colleagues to be informed.

Q.6. How should Managers/Headteachers deal with employees who become violent or aggressive?

Where managers/headteachers believe that an employee may display violent or aggressive behaviour they should ensure that this risk is considered in the way they approach the individual.

Should an employee display behaviour of a violent or aggressive nature, managers/headteachers should remove themselves and others from the situation. Where an employee becomes violent managers/headteachers may have to consider police involvement.

Q.7. When would it be appropriate to use suspension?

In general, suspension of any employee can cause great distress and so must only be used as a last resort e.g. if as a result of alcohol or substance misuse it can be shown that the employees continued presence at work will put them or others at personal risk.

In line with the relevant Scheme of Delegation the relevant manager/headteacher may consider a short period of suspension from work and in all cases this would be with full pay

Human Resources must be contacted at the earliest opportunity where suspension is a consideration. A manager/headteacher can still remove an individual from an activity or send them home whilst the situation is considered, with suspension being confirmed once appropriate delegation received.

Q.8. How should time off be managed/recorded?

Generally speaking, hospital/clinic appointments would not usually be classed as sickness absence but this depends on the nature and/or duration of the appointment. If the appointment was the first with a consultant it would be classed as Authorised Absence. For any follow up appointments, where possible staff will be given opportunity to make back the hours and where this is not possible it will be treated as authorised unpaid absence.

Should an employee feel unwell following such an appointment/treatment and take time off, this should be recorded as sickness absence? Always refer to HR for advice.

Q.9. How should the absence be recorded for where the employee requires treatment as an inpatient for rehabilitation?

This should be recorded as sick leave and treated accordingly for Bradford score purposes, as would be the case with any usual medical admittance to hospital.

Appendix 9

Costs of testing

The costs of testing will be met from the budget employing the individual.

Call out including breath test (at least 48hrs notice)	£ 236.08
Call out including breath test (with less than 48hrs notice)	£343.19

**Prices exclude VAT
